

## Technical information

**Productnumber : 86G15-35**

### Product description

High-quality aluminum ramp with curved construction, set of 2 pieces. A curved ramp is widely used for low machines and vehicles. A curved construction ensures that there is no 'deep' angle between the highest point of the ramp and the tail lift / elevation. Easy to move due to the light weight, 3 kg each. The anti-slip profile prevents slipping.

Maximum load capacity 450 kg. Ideal angle 27 degrees. Ideal trailer height 50 cm. The load capacity depends on various factors and decreases if:

- the drive-on height of the ramp decreases.
- the axle distance is less than 1250 mm.
- the road contact is less than 100 x 150 mm.
- the weight distribution is different than 2/3 on one axle and 1/3 on the other axle.
- drive-up speeds are above 5 km/h.
- there are vibrations when accelerating or braking abruptly.

The ramps must be fully raised with the flat part attached to the bottom of the trailer so that it cannot slide. When calculating the load capacity, the dynamic load has been taken into account and the safety factor 2 has been used with a weight of more than 500 kg. Calculate the weight as follows; total weight of the vehicle + fuel (1 liter is 1 kg) + weight of 1 person + weight of accessories.

\* not suitable for tracked vehicles!

### Specifications

Article arrangement: New  
Version: aluminium 150 cm (pair)  
Top: driving area of anti slip profile  
Width (mm): 200  
Loading capacity (kg): 450  
Options: NOT suitable for caterpillar  
Batch (items): 2  
Min Height (mm): 300  
EAN Code (Gtin) 8719424025590

Type: access ramp curved  
Material: aluminium  
Length (mm): 1490  
Height (mm): 35  
Weight (kg) 3  
Type number: 86G  
Drive width: 200  
Max Height (mm): 500
