Product description

Black plastic drip tray with a capacity of 250 litres. This is a drip tray without a grid. When not in use, these bins stack very well and save space.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New

Version: modular leakingbucket - 250 liter

Floor: oil- and water tight

Colour: black

Width (mm): 1200

Volume (ltr): 250

Type number: 48-107

EAN Code (Gtin) 8719424065459

Type: Retention Basin

Material: polyethylene

Subgroup: Plastic trays

Length (mm): 1600

Height (mm): 180

Weight (kg) 10.5

Additional specifications: WITHOUT GRID!
