Technical information

Productnumber : 42.197.22.542

Product description

Corner protector with guide roller prevents damage to racks or machines in the warehouse or workshop. The vertically fixed roll dissipates a large part of the lateral forces. This version of the collision protection extends the life of the corner, dampens and reduces shocks. If a rack in your warehouse, for example, is lightly hit, this is immediately a weak spot in the upright. By installing this corner and collision protection you prevent even the smallest incident from leading to major consequences.

The striking yellow brackets are made of 6mm thick high-quality steel and provided with black signal stripes. The feet are provided with 4 drilled holes with a diameter of 14 mm.

Produced according to BGR234 and DIN 4844 guidelines.

Required mounting material (NOT included as standard - see to be combined with):

4 x universal plugs S12 with screw 8/100 (article number: 42.109.17.393) of

4 x push-through anchors for concrete floors 12 /120 (article number: 42.109.24.665)

Specifications

Article arrangement: New

Version: collision protector with guide roller

Subgroup: Shelving protection

Surface treatment: plastic-coated

Width (mm): 160

Weight (kg) 9

Additional specifications: only suitable for indoor use!

Type: bumper protection

Material: steel

Colour: black/yellow

Length (mm): 160

Height (mm): 400

Type number: 42-LP

EAN Code (Gtin) 8719424059571
