Technical information

Productnumber : H87302

Product description

These TÜV certified stacking racks can be used as mobile storage racks. Available in various versions, but above all flexible in height. The loading floor is designed for all standard pallet sizes, voluminous or goods that are difficult to palletise.

You can determine the height of the stacking racks yourself by choosing from different stanchion lengths. To determine the useful height (read: height to be loaded), take the total stanchion length minus 170 mm (example: stanchion length 1680 mm - 170 mm = 1510 mm). Of course, deviations from the standard lengths are possible, please contact us for the possibilities.

An indispensable logistics solution for almost any warehouse or company logistics. Think of environments such as the metal industry, large construction, small construction, production companies and the automotive industry. Because the rack has space for 2 pallet places, it is very suitable for long material or large material.

Specifications

Article arrangement: Rental

Version: suitable for stanchions 60.3

Floor: open lattice frame

Surface treatment: galvanized

Internal length (mm): 1780

Internal width (mm): 935

Insertion height (mm): 100

Weight (kg) 40

EAN Code (Gtin) 8719424052633

Type: mobile storage rack TÜV

Material: steel

Colour: colorless

Length (mm): 2015

Width (mm): 1165

Height (mm): 300

Loading capacity (kg): 2000

Type number: 87301
