Product description

Folding tower for the hard-working DIY-user or the professional

The RS TOWER 34 is a lightweight folding tower. Suitable for outdoor work. Ideal for indoor due to compact format. Want to go higher? The system is modular. With module 2 en 3, you can extend it to 7.80 m working height. This folding tower is made for the hard-working DIY-user. But can also be used for professional tasks. The maximum load is 150 kg/m².

The single width frames of 0.75 metres means it fits through every standard door opening. The platform is available in the length: 1.65. The Folding unit of the scaffolding means there are very few separate parts and the whole unit folds in half. It takes up very little space.

- Single width folding-/rolling tower, fits through every standard door opening
- Modular, easy to extend
- Ideal for lighter jobs
- Foldable and compact to store and transport
- Adjustable wheels (125mm)
