

Product description

Plastic drip tray suitable for one IBC container. This receptacle is made of high-quality plastic and equipped with a drain tray. The content of this drip tray is 1100 liters and has no grid. (Attention! This article is exclusive of IBC)

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid a container is collected. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

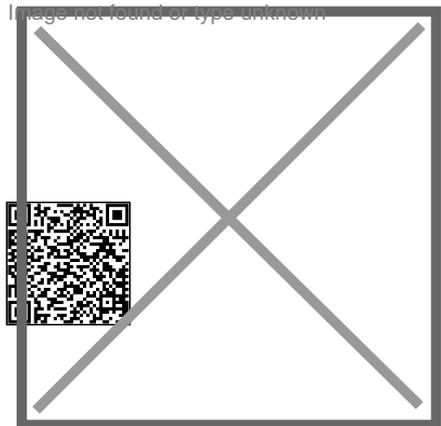

Specifications

Article arrangement: New
Version: for 1100 litres, without grid
Walls: walls closed
Subgroup: Plastic trays
Length (mm): 2065
Height (mm): 705
Volume (ltr): 1100
EAN Code (Gtin) 8719424004656

Type: receptacle for IBC
Material: PE
Floor: oil- and water tight
Colour: blue
Width (mm): 1445
Loading capacity (kg): 1500
Type number: 37-0022
