

## Product description

This drip tray without grid made of high-quality PE can be placed under an IBC. The container has a high resistance to chemicals and a capacity of 1100 litres. The recesses in the bottom make it easy to move the drip tray with a forklift or pallet truck.

Please note! Supplied without grid bottom. See Art. no. 48-8582 for the same drip tray with grid bottom.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid collected in a container. To this end, the collection container must have a capacity of at least $110 \%$ of the largest package. However, if $10 \%$ of the total content of the packages is more than $110 \%$ of the content of the largest package, then the collection capacity must be equal to $10 \%$ of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

## Specifications

Article arrangement: New
Version: without galvanized grid
Floor: oil- and water tight
Colour: black
Width (mm): 1450
Loading capacity (kg): 2000
Weight (kg) 75
EAN Code (Gtin) 8719424010381

Type: receptacle for IBC
Material: polyethylene
Subgroup: Plastic trays
Length (mm): 1450
Height (mm): 1000
Volume (Itr): 1100
Type number: 48-8581
