Product description

Steel lacquered drip tray suitable for twelve 200 liter drums. The collection tray is made of painted steel and the grille of hot-dip galvanized steel. The collection volume is 470 litres. The brackets on the underside make it easy to move the drip tray by a forklift or pallet truck.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! When a drain tap is mounted on the drip tray, all regulations are canceled. Any form of modification is not allowed.

Specifications

Article arrangement: New

Version: for 12 x 200 litre drums

Walls: walls closed

Top: 1000kg/m²

Colour: orange

Surface treatment: painted

Width (mm): 1300

Volume (ltr): 470

Collection volume (ltr): 470

Additional specifications: StawaR approved (DE)

Type: receptacle for drum

Material: steel

Floor: with galvanized grid

Subgroup: retention basin steel

Ral colour: 2000

Length (mm): 3880

Height (mm): 200

Weight (kg) 277

Type number: 410-395

EAN Code (Gtin) 8719424007794
