

Technical information

Productnumber : 40-2043V

Product description

Steel drip tray suitable for four 200 liter drums. The capacity of this container is 279 liters. The drip tray and grid are made of hot-dip galvanized steel.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New

Version: for 1-4 200 l drums

Walls: walls closed

Top: 1000kg/m²

Colour: colorless

Length (mm): 2400

Height (mm): 250

Collection volume (ltr): 279

Additional specifications: StawaR approved (DE)

Type: Retention Basin

Material: steel

Floor: with galvanized grid

Subgroup: retention basin steel

Surface treatment: galvanized

Width (mm): 800

Weight (kg) 132

Type number: 40-2000

EAN Code (Gtin) 8719424005813
