Technical information

Productnumber : 12-7641EURDBLK

Product description

The padlock with free combination selection with master key has a 40 mm wide zinc body for durability with black painted finish... The 6 mm diameter shackle is 27 mm long and made of nickel-plated steel to resist cutting and sawing through. Security with 4-digit free combination selection offers keyless convenience. Master key provides spare access and a code loss decode function to never be locked out in case of a forgotten combination. The limited lifetime warranty offers peace of mind coming from a brand you can trust.

- 40 mm wide solid zinc housing for durability
- Nickel-plated steel shackle that resists cutting
- Security with 4-digit free combination selection for keyless convenience
- Master key for spare access and decode function in case of lost code
