Product description

A used plastic stacking bin with Euronorm dimensions 600x400 mm is a widely used standard in the logistics industry. These bins are designed to fit efficiently on pallets and in racks, making them ideal for transport and storage. With a capacity of 21 liters, they provide ample space for a variety of applications. The perforated walls and bottom of the storage bin provide air circulation and drainage, which is especially useful when storing materials that are sensitive to moisture. This ensures good ventilation and prevents accumulation of condensation or water. The stacking lugs make them firmly stackable among themselves, maximizing space utilization and ensuring stability during stacking.

Notice! Contains several shipping damages (see detail photos).

Specifications

Article arrangement: Used
Version: walls + floor perforated
Walls: perforated
Food-safe: no
Colour: black
Length (mm): 600
Width (mm): 400
Height (mm): 155
Volume (ltr): 21
Type number: 7320GB

Type: stackable
Material: plastic
Floor: perforated
Euronorm (mm): 600 x 400
Surface treatment: signs of use
Internal length (mm): 570
Internal width (mm): 370
Internal height (mm): 100
Weight (kg) 0.5
