Technical information

Productnumber : 98-8069GB

Product description

A used stacking bin plastic with standard dimensions of 600x400 mm, which means it complies with the European Euronorm standard. This sizing ensures compatibility and interchangeability within logistics systems that follow the same standard. Made of polyethylene, a widely used plastic material known for its durability, flexibility and chemical resistance. With a capacity of 60 liters, the warehouse bin is suitable for storing a significant amount of goods. This makes it versatile for various applications. The front grab opening facilitates access to the bin's contents, which is convenient when loading and unloading. Equipped with one open handle at the rear and two open handles at the sides. This configuration makes it easy to carry and move the bin from different positions. The perforated walls and bottom of the bin provide ventilation and are useful when storing goods that require air circulation. This helps prevent condensation or mold growth. Designed to be inter-stackable, making efficient use of storage space. Ideal for use in various environments such as warehouses, distribution centers, manufacturing facilities.

Specifications

Article arrangement: Used
Version: 1 short side open
Walls: open handles
Food-safe: no
Colour: grey
Length (mm): 600
Width (mm): 400
Height (mm): 320
Volume (ltr): 60
Type number: 8069GB

Type: stackable
Material: polyethylene
Floor: perforated
Euronorm (mm): 600 x 400
Surface treatment: signs of use
Internal length (mm): 550
Internal width (mm): 350
Internal height (mm): 315
Weight (kg) 2
