Technical information

Productnumber : 15-FERCB3

Product description

A steel hinged locking bar made of hot-dip galvanized steel. A durable security element used to prevent inadvertent opening of drawers in assortment cabinets. This is especially important in situations where drawer contents must remain organized or when the cabinet is being moved on the move. The bar provides an effective locking solution to keep contents secure. The hinged design makes it easy to install and allows for smooth operation. This is especially important in situations where drawers are opened and closed frequently. Made of hot-dipped galvanized steel. This makes the locking rod resistant to rust and other forms of corrosion, making it suitable for long-term use even in demanding environments. The rod can be easily installed and removed through pre-drilled holes.

Specifications

Article arrangement: New

Version: locking bar

Colour: colorless

Type number: 15-FERC

Type: accessories

Material: steel

Surface treatment: galvanized
